### FISH HEALTH INSPECTION REPORT

This report is NOT evidence of future disease status. To determine current status, contact inspecting biologist below.

#### Name of Fish Source
Livingston Stone National Fish Hatchery

#### Address & Location of Fish Source
16349 Shasta Dam Blvd
Shasta Lake, CA 96019

#### Name of Owner or Manager
John Rueth 530-275-0549

#### Inspection Dates
- This: 24 Jan 01
- Prior: 25 Jan 00, 20 Jan 99

#### Classification
s-RS,s-IHNV

#### Classification for Prior Inspection
RS, s-IHNV s-RS, s-IHNV

#### Pathogens Inspected for and Results

**Remarks:**

Given the endangered listing & no infectious disease history during rearing – only 30 lethal samples

**RS testing on kidney tissue by polyclonal ELISA. No BKD seen in stock. Rs ELISA Negative-Positive Cutoff = 0.083; max. sample OD 0.092 - At my discretion, this population is considered suspect (s-) for RS based on the low kidney ELISA value and low OD values from the broodstock (max OD = 0.216). The s-IHNV classification is due to IHNV detection in the broodstock. NO ROSETTE AGENT PARASITE HAS BEEN DETECTED IN BY98-2000 BROODSTOCK USED FOR LIVINGSTON STONE NFH

---

#### Type of Water Supply
- Spring
- Well
- Stream
- Impoundment
- Enclosed
- Free of fish

1 - Use standard FWS abbreviations (see back of this page)
2 - For hatchery fish give age in months: for feral fish use symbols e=eggs or fry; f=fingerling; y=yearlings; b=older fish.
3 - See list of pathogen abbreviations on back of page; findings reported as number examined / results where - = negative and + = positive; other pathogens listed in remarks.
